

A large grid of 1000 small images showing the progression of a handwritten character 'a' from left to right and top to bottom. The grid is organized into 10 columns and 10 rows. Each small image shows a different stage of the character's formation, with red dashed lines indicating the stroke path. The character 'a' is formed by a single continuous stroke that starts at the top left, moves right, then down, then left, and finally up to complete the loop. The grid shows the character being formed in various orientations and positions, illustrating the complexity of the stroke.
